Education

Master of Computer Applications (M.C.A) in Computer Science, Viswabharathi P.G. College, IN, 1999

B.Sc (Computer Science) in Maths, Statistics, Computer Science, New Science College, OU, IN, 1995

Intermediate Eduction (12th Standard) in Maths, Physcis, Chemistry, Noble Jr. College, Board of Intermediate Education, AP, IN, 1992

10th Standard in General Subjects, B.K.B High School, IN, 1990

Profile

PMP®-certified IT Leader, SAFe® Program Consultant, and Agile Coach with 25+ years of experience delivering large-scale business and technology transformation programs across global enterprises. Proven expertise in **Program Management, Product Management, Digital Transformation, Agile Delivery, Cloud Adoption, and DevOps Enablement**, with a strong track record of leading complex initiatives from strategy through execution.

Known for building trusted stakeholder relationships, driving business value through effective governance, financial management, and risk mitigation, and consistently delivering outcomes on time and within budget. Passionate about developing high-performing teams, fostering a culture of continuous improvement, and enabling operational excellence through data-driven decision-making and customer-centric delivery.

Key skills

Program & Portfolio Management • Product Management • Agile & SAFe® Leadership • Digital Transformation • Cloud & DevOps • Stakeholder Management • Financial Governance • Risk Management • Operational Excellence • Team Leadership & Coaching • Process Optimization • Customer Success

Work experience

Sr. Project Manager/Agile Coach

IBM India Private Limited, India | Sep 2005 - Present

Viswanath Sadhu joined **IBM** as a Software Engineer in 2005 and has steadily grown into leadership roles spanning **Technical Lead, Project Manager, Program Manager, DevOps Consultant, and Agile Coach**. With over 25 years of industry experience, he combines deep technical knowledge with strong program delivery and people leadership skills.

Over the past 12+ years, he has successfully led complex projects and transformation programs for global enterprise clients, managing cross-functional teams of up to 50 members across onshore and offshore locations. His expertise includes **Program & Project Management, Agile Transformation, DevOps Enablement, AMS Delivery, Production Support, Financial Management, Risk Mitigation, and Stakeholder Engagement**.

Known for his collaborative leadership style and strategic mindset, Viswanath excels at building high-performing teams, driving operational excellence, and delivering business outcomes in dynamic and complex environments.

Sr. Developer / Team Lead

Satyam Computer Services Limited, India | Apr 2003 - Sep 2005

Worked as a **Technical Lead** for approximately **2.5 years**, leading a team of **14 professionals** in delivering application development and support services for **British Petroleum (BP)**. Successfully managed team coordination, technical delivery, stakeholder communication, and project execution, ensuring high-quality outcomes and adherence to client expectations.

Contractor/Consultant

RANN Info [Contractor to GE-Industrial Systems], India | Feb 2003 - Apr 2003

Successfully designed, developed, and implemented an **e-Leave Management Portal**, streamlining leave request processing, approval workflows, and employee leave tracking, resulting in improved operational efficiency and user experience.

Consultant

Renaissance Infotech, India | May 2002 - Feb 2003

Designed and developed **iLabs**, a Diagnostic Services Management System, at Renaissance Infotech. Delivered end-to-end functionality for patient registration, test management, sample tracking, and report generation. Collaborated with stakeholders to translate business requirements into scalable solutions, improving laboratory efficiency, process automation, and service delivery.

Developer

Goldstone Technologies, India | Feb 2001 - May 2002

Developed and enhanced the **e-Merchant Banking, Accounting, and Financial Management System**, delivering key functionality improvements across banking and financial operations. Collaborated with cross-functional teams to implement business requirements, optimize application performance, and ensure successful deployment, contributing to improved operational efficiency and business process automation.

Software Engineer - Trainee

EPTRI, India | Nov 1999 - Jan 2001

Roles:

Trainee Software Engineer.

Assignment history

Delivery Manager / Agile Coach

HEINEKEN, India | Oct 2025 - Present

Project name: Global Observability Platform Implementation

Memberships

PMI

Scaled Agile Org

The **Heineken Global Observability Platform** provides end-to-end, real-time visibility across global IT systems, cloud environments, and critical business workflows. By consolidating metrics, logs, and telemetry data, it enables proactive monitoring, rapid incident detection, and optimized operational stability to support seamless connected brewing operations worldwide.

The **Heineken DBB Hypercare** initiative delivers intensive, end-to-end post-implementation support for the Digital Business Backbone across global markets. Designed to guarantee seamless transition, system stability, and rapid issue resolution, it minimizes operational disruption, enhances user adoption, and ensures reliable performance for core supply chain and commercial workflows worldwide.

Contribution

• **Built a unified monitoring strategy:** Led the global observability roadmap for Heineken, cutting down redundant tools and standardizing our platform to give teams clear, single-pane visibility into system health.
• **Upgraded real-time tracking:** Rolled out centralized dashboards, log analytics, and distributed tracing, making it much faster to spot, trace, and troubleshoot issues before they impact users.
• **Shifted from reactive to proactive:** Set up clear golden signals, SLIs/SLOs, and smart alerting frameworks while championing SRE practices to catch problems early and reduce downtime.
• **Stabilized major rollouts in Hypercare:** Guided critical applications through post-launch Hypercare, managing incident triage, risk control, timelines, and budgets to ensure a smooth transition into production.
• **Bridged business, tech, and vendors:** Kept global business leaders, engineering teams, and third-party vendors closely aligned during high-priority incidents and complex platform deliveries.

Program Manager/Agile Consultant

UNION BANK OF INDIA, India | May 2024 - Oct 2025

Project name: UBI - Digital Banking Platform.

Union Bank of India (UBI) is undertaking a strategic initiative to design, build, and operate a next-generation **Digital Banking Platform**. Guided by a customer-first philosophy and a digital-first business model, the platform aims to deliver a seamless, high-performance, and secure banking experience across web, mobile, and API channels.
• **Unified Customer Experience:** Provide an exceptional, end-to-end digital banking experience for diverse customer segments, including **Retail, Corporate, Agri, NRI, and MSME**.
• **Omnichannel & API Architecture:** Deliver features across both **Mobile** and **Web** applications while providing robust **API interfaces** for integration and scalability.
• **Modern Technology Platform:** Establish a world-class, scalable, and secure technology foundation to power innovative digital banking services.
• **Comprehensive Quality Assurance:** Conduct end-to-end functional, performance, security, and integration testing across Mobile, Web, and API layers to ensure multi-segment reliability and compliance.

Contribution

• **Proactively reduced recurring incidents** by fostering a problem-management culture, improving platform stability and operational reliability.
• Ensured **100% audit readiness and business continuity** through successful

execution of Disaster Recovery (DR) drills and resilience testing.

• Delivered a **multi-product digital platform** serving five customer segments with 100% on-time and on-budget execution.
• Built and led **cross-functional teams of 40+ professionals**, including developers, designers, and product specialists.
• Achieved **95% customer satisfaction** through consistent delivery excellence and proactive stakeholder engagement.
• Established Agile delivery practices that increased **delivery velocity by 40%** while maintaining quality standards.
• Implemented metrics-driven performance tracking, resulting in a **25% improvement in user adoption and engagement**.

Sr. Technical Program Manager

GOOGLE INC, India | Jun 2023 - Dec 2023

Project name: CAPE Team

The CAPE team in Google provides expertise in providing Production support for CRM, LMS, CMS, and customer conversations that are used by Google teams across the globe.
As a Technical Program Manager, I was responsible for transitioning key Google business operations across multiple businesses of Google, maintained in Salesforce, called Salesforce ORGs from a different vendor of Google to IBM.

Contribution

• Supported seven Google organizations: **Firebase, DeepMind, Executive Summary, PlayBD, UXI, UXR, and GDO**, delivering Salesforce and operational support services.
• Led the implementation and support of **Salesforce Sales Cloud and Service Cloud** solutions across all supported organizations.
• Directed three cross-functional teams to successfully transition **7 Salesforce orgs** and **12 first-party applications** from multiple vendors to IBM within a two-month timeframe.
• Delivered a seamless migration with **zero business disruption**, ensuring service continuity and stable production support.
• Achieved **zero-defect delivery** within the first two sprints by successfully addressing all customer-reported defects and functional requirements.
• Managed the onboarding and integration of **50+ team members** within a compressed two-week schedule.
• Completed a successful knowledge transfer and project handover, ensuring a smooth transition to the incoming Project Manager.

Agile Coach/Consultant

BAXTER HEALTHCARE CORP, India | Jul 2021 - Apr 2023

Project name: Baxter - B2B Implementation

Baxter is a global pharmaceutical company with operations spanning multiple countries. IBM engaged with Baxter under a fixed-bid contract to design and develop a comprehensive B2B Sales Portal on the Salesforce platform. The solution focused on building a scalable and sustainable architecture, incorporating key features such as order and return management, Catalog management, integrated communications, and advanced reporting capabilities.

Contribution

• Successfully turned around a **Red/Amber project to Green status**, delivering sustained project health and achieving **27% gross profit**.
• Reduced project costs by **10%** through strategic resource planning and optimization.
• Drove significant business growth, increasing revenue from ☐ **11.3 Cr ($2.5M) to ☐ 26 Cr ($5.5M)**
• Led the successful rollout of a **global customer portal across 23+ countries**, ensuring timely delivery and stakeholder alignment.
• Partnered closely with business and technical stakeholders to gather requirements, manage dependencies, and drive transparent, customer-focused delivery.
• Coached Agile teams, Scrum Masters, and Product Owners on Agile principles and best practices, improving team effectiveness and delivery outcomes.
• Fostered a culture of ownership and accountability, enabling on-time and within-budget project delivery.
• Strengthened customer satisfaction through proactive communication, stakeholder engagement, and effective expectation management.
• Developed and executed a comprehensive risk management strategy, resulting in a **30% reduction in project risks**.

Agile Consultant

GENERAL MOTORS, India | Jul 2019 - Jul 2020

Project name: CDAO - Chief Data Analytics Office

GM is a large American multinational corporation headquartered in USA that designs, manufactures, markets, distributes vehicles, vehicle parts, and sells financial services. They have created a new business unit for data and analytics operations called Chief Data and Analytics office (CDAO) to centralize, streamline and enable rapid knowledge sharing between functions and results in better, faster & more measurable outcomes. IBM has signed contract to jointly work with CDAO team in Managing the current portfolio of applications and help them in design and development of new Analytics applications leveraging their new data platform framework.

Contribution

• Partnered with client teams to perform **Value Stream Mapping (VSM)** and identify process improvement opportunities.
• Defined the **MVP** for Enhancements, POCs, and Production Support workstreams.
• Developed reusable **Agile frameworks and templates** to standardize delivery practices.
• Configured **SharePoint** collaboration environments aligned with Agile processes and team workflows.
• Established key **KPIs and metrics** to enable performance tracking and governance.
• Recommended **SharePoint-TFS integration** to support Agile planning, execution, and reporting.
• Designed executive **dashboards and reporting solutions**, improving visibility and data-driven decision-making.

Project Manager

Westpac Corporation, India | Jul 2017 - Jul 2019

Project name: Cards Domain – HIS Remediation

Westpac initiated a modernization program to transition its legacy VB6.0 applications to VB.NET, emphasizing modular design, improved maintainability, and long-term scalability. The initiative followed a phased migration approach involving detailed codebase analysis, feature prioritization, and parallel development to ensure minimal disruption to business operations. A key focus was on standardizing architectural patterns and introducing reusable components to enhance development efficiency. The strategy emphasized separation of concerns and robust error handling to build a more resilient, testable system. The HIS team ensured alignment with Westpac's broader technology roadmap and readiness for integration with modern platforms.

Contribution

• Led end-to-end delivery of VB to VB.NET migration projects as **IT Project Manager**, ensuring successful and timely execution.
• Managed **SCM, Build, and Release** activities, overseeing deployments across SIT, UAT, and Production environments.
• Drove build and deployment automation initiatives, improving release efficiency and reducing operational risks.
• Collaborated with project and resource managers to align staffing, project priorities, and release schedules.
• Provided regular project status updates, delivery insights, and key metrics to IBM and client leadership.
• Proactively managed risks, issues, dependencies, and escalations, ensuring timely resolution and mitigation.
• Ensured delivery quality through structured reviews across design, development, and testing phases.
• Produced stakeholder reports and governance metrics, enabling informed decision-making and delivery transparency.

DevOps Consultant

JPMC, India | Apr 2016 - Jun 2017

Project name: JPMC - CCB line of Business

This project focused on managing middleware testing and establishing DevOps pipelines for a JPMC. The goal was to ensure seamless integration and data flow between upstream and downstream systems. Automated CI/CD pipelines were implemented to enhance deployment efficiency and reduce manual intervention. Comprehensive testing strategies were developed to validate middleware components under various scenarios. The project aimed to improve the overall system reliability, deployment speed, and operational stability.

Contribution

• Successfully led **Middleware Testing and DevOps delivery** for **JPMC CCB**, managing a global team of 12 and supporting critical business releases.
• Implemented and enhanced **CI/CD automation**, improving deployment reliability, release velocity, and operational efficiency.
• Oversaw release management across PT, UAT, and Production environments, ensuring seamless deployments and system stability.
• Drove build and deployment automation initiatives, reducing manual intervention and improving delivery turnaround times.
• Enabled effective workforce planning and release readiness through close collaboration with project, resource, and client stakeholders.
• Maintained strong project governance by proactively managing risks, dependencies, and stakeholder communications, contributing to successful

project outcomes.

DevOps Consultant

IBM DevOps Consultant, India | Jan 2015 - Aug 2015

Project name: DevOps Consultant

• As part of an **IBM DevOps Consulting Initiative**, the engagement focused on helping enterprise clients accelerate their DevOps transformation by addressing challenges related to fragmented toolchains, manual processes, limited automation, and inefficient release management.
• The initiative aimed to define a scalable DevOps operating model through CI/CD adoption, toolchain modernization, release automation, and process standardization.
• By aligning development, testing, and operations practices, the program enabled organizations to improve collaboration, enhance software delivery efficiency, increase deployment reliability, and drive faster business value realization.

Contribution

• Assessed DevOps readiness for multiple enterprise clients, (e.g. Vodafone Greece, Birla Sunlife) enabling informed investment and transformation decisions.
• Identified critical process and tooling gaps, helping clients improve delivery efficiency, quality, and release predictability.
• Developed strategic recommendations and implementation roadmaps that supported successful DevOps adoption initiatives across client organizations.

Offshore Delivery Manager

Suntrust Bank, India | Oct 2012 - Dec 2014

Project name: Offshore Delivery Manager - Enterprise Client

Customer Information System (CIS) is a centralized platform that manages and stores comprehensive customer data. It maintains personal details such as names, contact information, identification documents, and links customers to all their accounts across the bank. CIS provides a 360-degree view of each customer, enabling better customer service and personalized offerings. It also plays a vital role in ensuring regulatory compliance, including Know Your Customer (KYC) requirements. By supporting data sharing across banking systems, CIS enhances operational efficiency, reduces fraud risk, and supports data-driven decision-making.

Contribution

• Optimized resource planning and staffing alignment with project roadmaps and release schedules, ensuring delivery readiness.
• Managed end-to-end resource governance, including stakeholder communication and workforce onboarding/offboarding coordination.
• Developed project estimates, schedules, and tracking dashboards to ensure on-time delivery and milestone adherence.
• Proactively mitigated risks, issues, and dependencies through effective project governance and quality reviews.
• Monitored KPIs and ensured compliance with IBM and client security standards while meeting utilization and people management objectives.
• Delivered transparent stakeholder reporting and governance, enabling informed decision-making and successful project execution

Project Manager

Citi Bank Mobile Office, India | Dec 2011 - Oct 2012

Project name: Citi Bank Credit Card(Japan Cards) Online and NFC.

Citi bank launched a digital initiative to boost customer acquisition by enabling online credit card applications and integrating NFC-based payments into its mobile app. The new digital journey allowed customers to apply for credit cards seamlessly, upload KYC documents, and receive instant updates. Simultaneously, the mobile app was upgraded with NFC technology, enabling secure, contactless payments using tokenization and biometric authentication. The project enhanced customer experience, reduced processing time, and increased reach in credit card space.

Contribution

· **Stakeholder Management:** Collaborated with Citi Bank teams across Japan, Singapore, and India, ensuring alignment between internal stakeholders and external vendors to drive common goals and manage expectations effectively.

· **Scope & Requirement Definition:** Led the end-to-end definition of business requirements, functional specifications, and technical feasibility.

· **Project Planning & Execution:** Developed detailed project plans with clear milestones, tracked progress, and ensured delivery within scope, time, and budget.

· **Risk & Issue Management:** Identified potential risks early, implemented mitigation strategies, and ensured uninterrupted project flow.

· **Quality Assurance & UAT Coordination:** Oversaw system testing, UAT, and ensured solutions met functional and security standards, including EMVCo and PCI compliance.

· **Communication & Reporting:** Provided regular status updates to senior management and ensured transparency through dashboards and progress reviews.

Project Manager

Standard Insurance Company, India | Sep 2010 - Nov 2011

Project name: PSC Re-Write & Common Track

PSC Re-Write is an initiative to Re-Write the Legacy APP to IBM Portal Server. Common track's objective is to consolidate all the data into one Database using Informatica and generate reports to help management take important decisions.

Contribution

• **Spearheaded project initiation with a 3-member team and successfully ramped up to 20 resources**, aligning with delivery needs and project scale-up plans.
• **Led end-to-end project management activities**—including planning, execution, tracking, and closure—ensuring on-time delivery and quality outcomes.
• **Managed cross-functional coordination** with Business Finance, Resource Management, Account, Geo teams, and the client, streamlining approvals, work orders, and communication.

• Drove schedule estimation and negotiation using **Expert Judgment**, aligning delivery timelines with client expectations and resource capabilities.

• **Implemented IBM's OPAL Quality Process** and achieved an **'A' rating in the Project Management Review (PMR)**, demonstrating excellence in project governance.

Technical Project Manager.

NW-Insurance - PLBO, India | May 2009 - Sep 2010

Project name: PCI Billing Services

The objective of this project is to maintain and enhance Nationwide PLBO's existing applications across multiple technologies. Maintenance activities include providing on-call support for production issues and addressing ad-hoc incidents or user queries as needed. Enhancement efforts focus on implementing new functionalities in response to change requests raised by Nationwide.

Contribution

• Contributed to **requirements gathering, scope definition, estimation, scheduling, and project planning**, ensuring effective governance across change, quality, financial, risk, and resource management.
• Ensured project requirements were formally **baselined and approved** prior to initiation, establishing clear scope alignment and stakeholder expectations.
• Developed and managed integrated **project plans**, tracking schedule and cost performance to ensure timely delivery of project milestones and releases.
• Proactively identified, assessed, and mitigated **project risks and issues**, driving timely resolution and minimizing delivery impact.
• Maintained accurate **project financial tracking** and provided regular financial and status reporting to client stakeholders.
• Established strong project governance through **continuous stakeholder communication**, including status reporting and risk/issue management, ensuring transparency and informed decision-making.

Associate Project Manager

Bank of Montreal, India | Sep 2005 - May 2009

Project name: BMO - Sales and Services Organization

The BMO Sales and Services organization initiated the setup of an offshore small projects team to support their existing development team, aiming to address short-term capacity constraints and enhance delivery efficiency.

Contribution

• Gathered and analyzed client requirements, translating business needs into **High-Level Design (HLD)** and **Detailed Design (DD)** specifications.
• Contributed to project lifecycle activities, including **project initiation, resource planning, PM tool setup, design reviews, and execution governance**.
• Managed project planning and control processes, including schedule tracking, progress monitoring, stakeholder coordination, and delivery planning.
• Implemented **IBM Quality Processes (OPAL)**, successfully supporting project reviews, internal audits, and compliance requirements while ensuring timely delivery of project artifacts.
• Led team coordination, task allocation, and technical guidance, fostering collaboration and driving adherence to project timelines and quality standards.
• Facilitated regular project governance meetings, risk reviews, and status discussions, enabling effective communication and successful project execution.
